

How to order Nirvana RC SailBoats

I have had many people wonder how to get one of the Radio Controlled Nirvanas so I am putting the information here.

The boat including the transmitter is **\$195**

Boat bow bumper in the same color **\$6**

Upgraded radio only available in blue boats add **\$60**

Crystal Set **\$20** (Very Limited)

You can send a check (made out to me):

Dan DeLave
11 Virgil Walk
Long Beach, CA 90803

Cell (562) 234-9238
Email: ddelave@aol.com

Or you can leave the amount in my file at the office of ABYC.

I do not order boats before getting paid for them as I have been caught holding boats without money. It has not been a problem so far as there was always someone that wanted one right after I ordered. We have a lot of boats now and I do not know how many more will be wanted so I am reluctant to carry extras.

It would be nice if you could write on the check your choice of colors (Red, Yellow, Blue).

I will assign you a number for the sail based on the time you ordered it. The numbers are all in the order bought. When you register your boat on line you will be assigned a number. You can ignore that number as we are closing in on three digits and I would like to have as many unique as possible.

We are the biggest fleet in the nation and there are some slight changes to the class rules because of us. We could have a Nationals and if only the people in the club showed up it would be the biggest one by far. It is pretty exciting that so many are having so much fun with this and getting back to the club more often. Seems that there is always some action on weekends even though it is not a Friday evening for the Nirvana class.

Later,
Dan DeLave
